Optional upgrade paths:

Total Control does this.

- One touch to all their entertainment. Show Clients they can be the master of their entertainment. Tap a button and the flat screen turns on, the Blu-ray fires up to their movie of choice and surround sound comes to life.
- Music in every room and every format. Provide easy access to all their favorite tunes regardless of format - in every room and even outdoors. Stream popular music services such as Pandora®, Rhapsody®, iTunes and thousands of other internet radio stations.
- Light up their lives. Set scenes and turn lights on and off from anywhere - individually or all at once. Cause lights to activate automatically based upon time of day or to illuminate the driveway when they arrive home in the evening.
- Put them in the comfort zone. They can warm up the house before even getting out of bed or turn off the air conditioning from their mobile phone while boarding a plane.
- Make every customer feel safe and secure. Give them instant peace of mind while at home or away. See who's at the door without leaving the kitchen, keep an eye on the baby's room and control security systems from their smartphone.
- Going green is easy. Total Control is green friendly and saves energy. Set schedules for temperature and lights based on time of day or year. Use URC sensors and cause shades to drop automatically based on ambient light changes.

Plus: Off-Site Programming Off-Site Control

** Includes labor for installation and programming of
** four devices: Receiver, Bluray, Cable and Apple TV
